License: No external font files are bundled or redistributed with this project; the typefaces are supplied by the operating system or browser environment.

AI Disclosure: Limited AI assistance using ChatGPT. Use involved assistance with semantic token naming and minor troubleshooting of isolated HTML/CSS implementation issues. I made the final system and design decisions, entered and reviewed the submitted code, and independently verified all features through testing, validation, and publication.

Code Defense: I designed the Community Room Reservation Request as a bounded, front-end form using native HTML and CSS. The form structure follows the completed field inventory so each collected value has a defined purpose, control type, submitted name/value, constraint, and data-minimization decision. Semantic fieldsets and legends organize related controls, while persistent labels and native input types support accessible interaction. Required fields and constraints use native HTML attributes such as required, min, max, step, and maxlength, with visible instructions provided before constrained fields. Help text is associated with relevant controls using aria-describedby.

The project also includes documented default, focus, required, valid, invalid, disabled, and static server-returned error states. Error examples use visible text in addition to styling, identify the affected field, preserve entered information, and explain how the user can recover. I adapted the Module 1 design-system approach through reusable color, spacing, typography, radius, focus, success, and error tokens rather than leaving the starter styling unchanged.

I verified the completed form through HTML and CSS validation, keyboard-only navigation, accessibility inspection, responsive viewport and 200% zoom tests, pointer operation, empty and malformed submissions, minimum and maximum boundary tests, a valid submission, and query-string inspection. The documented testing confirmed that the form remained usable and responsive and that the planned constraints and submitted values behaved as intended.

Required Tests:

Test	Outcome
320px Test	Condition: Viewed the completed form at a 320px viewport width. Observed: The page reflowed correctly at 320px. Text, headings, fieldsets, labels, instructions, and form controls remained readable and contained within the viewport. No horizontal scrolling, clipping, or overlapping content was observed.

Revision: None required.

Condition: Viewed the completed form at a 768px viewport width.
Observed: The page displayed correctly at 768px. Form sections, controls, labels, instructions, and headings remained properly aligned and readable. No horizontal overflow, clipping, or layout issues were observed.
Revision: None required.

768px Test

1280px Test

Condition: Viewed the completed form at a 1280px viewport width.
Observed: The page displayed correctly at 1280px. Content remained centered and constrained to a readable width, and all form sections, controls, labels, and instructions remained properly aligned. No overflow, clipping, or layout issues were observed.
Revision: None required

200% Test

The screenshot shows a web browser window with a URL bar indicating a local file path. The page title is "Full Name (Required)". Below the title is a text input field. The next section is "Email Address (Required)" with a placeholder text "Enter an email address in the format email@example.com." and a text input field. The third section is "F3 · Reservation Details" which contains three sub-sections: "Requested Date (Required)" with a date input field showing "mm/dd/yyyy" and a calendar icon; "Start Time (Required)" with a placeholder "--:-- --" and a clock icon, and a descriptive text "Choose a start time from 9:00 AM through 7:00 PM in 30-minute increments."; and "Duration (Required)" with a dropdown menu showing "Select a duration". The browser's zoom level is set to 200%.

Condition: Viewed the completed page at 200% browser zoom.
Observed: The page remained readable and functional at 200% zoom. Content reflowed appropriately, and headings, text, form controls, state examples, and error information remained visible and usable. No overlapping, clipping, or loss of content or functionality was observed.
Revision: None required.

Keyboard Accessibility/Navigation/Focus Visibility Test

Condition: Completed the form only using the keyboard, including navigating through all controls, entering fictional information, selecting radio buttons and checkboxes, choosing select options, and activating the Submit button.
Observed: All form controls were reachable and usable with the keyboard. Text fields, date/time controls, select options, radio buttons,

	checkboxes, textarea, and the submit button operated as expected. Keyboard focus remained visible throughout navigation. Revision: None required.
Comfortable Pointer/Touch Operation Test	Condition: Tested the form controls at a narrow viewport using pointer input, including text fields, select controls, radio buttons, checkboxes, and the submit button. Radio-button and checkbox text labels were also selected to verify that the associated controls could be activated without precisely targeting the small native control. Observed: All interactive controls were easy to select and operate. Clicking the visible labels for the radio buttons and checkboxes activated the corresponding controls, providing a larger usable target area. Text fields, the select control, and the submit button were also comfortably operable. Revision: None required.

Required/Optional Convention: Fields labeled "Required" must be completed. All other fields are optional.
Privacy: This is a front-end class prototype. Do not enter real personal data. Use fictional information only.

F4 · Requirements and Validation

Requirements, format instructions, and limits are provided before the relevant fields below.

F3 · Contact Information

Full Name (Required)

Email Address (Required)
Enter an email address in the format email@example.com.

F3 · Reservation Details

Requested Date (Required)

Start Time (Required)
Choose a start time from 9:00 AM through 7:00 PM in 30-minute increments.

Duration (Required)
Select a duration

Expected Attendees (Required)
Enter a whole number from 1 through 20.

F3 · Room Layout (Required)

Choose one room layout.

☐ Conference style Tables
☐ Classroom style Rows

F3 · Equipment

☐ Projector
☐ Whiteboard

Additional Notes (Optional)

Add any reservation details not covered above. Do not include sensitive information. Maximum 300 characters.

- Labeled by:** label
- Source order viewer**

Condition: Inspected representative text input, radio group, checkbox, select, and textarea controls using the browser Accessibility panel.

Observed: The inspected controls exposed meaningful accessible names derived from their visible labels and legends. The Full Name field was identified as a text input, the Room Layout choices were associated with their labeled group, Projector was identified as a checkbox, Duration was identified by its visible label, and Additional Notes exposed its visible label and associated instructional description.

Revision: None required.

Fictional Test-Data List	Evidence
Empty Submission Test - All required fields left blank.	Condition: Attempted to submit the primary form with all required fields empty. Observed: The browser blocked submission and displayed native required-field validation, directing attention to the first required field that needed completion. Revision: None required.

Submit Reservation Request

Malformed Submission Test - Email Address: john.doe to intentionally trigger native email-format validation.	Condition: Completed the required fields but entered a malformed value in the required email field and attempted submission. Observed: The browser blocked submission and displayed native email-format validation for the malformed email address. Revision: None required. 
Boundary Minimum Test - Full Name: John Doe; Email: john.doe@gmail.com; Requested Date: September 15, 2026; Start Time: 9:00 AM; Duration: 1 hour; Expected Attendees: 1; Room Layout: Conference-style Tables; Equipment: Projector and Whiteboard; Additional Notes: blank.	file:///C:/Users/megre/Downloads/ASSESSMENT-Inclusive-Form-Flow-Starter/Application,%20Registration,%20or%20Request%20Flow/index.html?requester_name=John+Doe&email=john.doe%40gmail.com&reservation_date=2026-09-15&start_time=09%3A00&duration=1-hour&attendees=1&room_layout=conference&equipment=projector&equipment=whiteboard&notes=# Condition: Submitted the form using the minimum permitted values for constrained fields, including a 9:00 AM start time and 1 expected attendee. Observed: The minimum boundary values were accepted without validation errors and the form proceeded with submission. Revision: None required.
Boundary Maximum Test - Full Name: John Doe; Email: john.doe@gmail.com; Requested Date: September 15, 2026; Start Time: 7:00 PM; Duration: 3 hours; Expected Attendees: 20; Room Layout: Conference-style Tables; Equipment: Projector and Whiteboard; Additional Notes: blank.	file:///C:/Users/megre/Downloads/ASSESSMENT-Inclusive-Form-Flow-Starter/Application,%20Registration,%20or%20Request%20Flow/index.html?requester_name=John+Doe&email=john.doe%40gmail.com&reservation_date=2026-09-15&start_time=19%3A00&duration=3-hours&attendees=20&room_layout=conference&equipment=projector&equipment=whiteboard&notes=# Condition: Submitted the form using the maximum permitted values for constrained fields, including a 7:00 PM start time and 20 expected attendees. Observed: The maximum boundary values were accepted without validation errors and the form proceeded with submission. Revision: None required

Valid Submission Test Full Name: John Doe; Email: john.doe@gmail.com; Requested Date: September 15, 2026; Start Time: 12:00 PM; Duration: 2 hours; Expected Attendees: 15; Room Layout: Conference-style Tables; Equipment: Projector; Additional Notes: blank.	file:///C:/Users/megre/Downloads/ASSESSMENT-Inclusive-Form-Flow-Starter/Application,%20Registration,%20or%20Request%20Flow/index.html?requester_name=John+Doe&email=john.doe%40gmail.com&reservation_date=2026-09-15&start_time=12%3A00&duration=2-hours&attendees=15&room_layout=conference&equipment=projector&notes=# Condition: Completed all required fields using valid fictional information within the defined constraints and attempted submission. Observed: No native validation errors prevented submission, and the form accepted the valid fictional values. Revision: None required.
Query String Inspection Full Name: John Doe; Email: john.doe@gmail.com; Requested Date: September 15, 2026; Start Time: 12:00 PM; Duration: 2 hours; Expected Attendees: 15; Room Layout: Conference-style Tables; Equipment: Projector and Whiteboard; Additional Notes: This is a test.	file:///C:/Users/megre/Downloads/ASSESSMENT-Inclusive-Form-Flow-Starter/Application,%20Registration,%20or%20Request%20Flow/index.html?requester_name=John+Doe&email=john.doe%40gmail.com&reservation_date=2026-09-15&start_time=12%3A00&duration=2-hours&attendees=15&room_layout=conference&equipment=projector&equipment=whiteboard&notes=This+is+a+test.+# Condition: Submitted the form using fictional test information with method="get" and inspected the resulting URL to verify the submitted field names and values. Observed: The query string displayed the expected submitted names and values, including requester_name, email, reservation_date, start_time, duration, attendees, room_layout, equipment, and notes. Both selected equipment options appeared separately as equipment=projector and equipment=whiteboard, which correctly represents the two checkboxes sharing the same submitted name. The submitted values matched the selections entered into the form. Revision: None required for the form behavior.

53	Due to their dynamic nature, CSS variables are currently not statically checked

State Matrix

State	Evidence	User Cue
Default	Blank text input shown in the F5 specimen with its visible label and standard control styling.	The control appears in its normal untouched state with no error or success message.
Focus	Focus example uses the CSS :focus-visible rule.	A visible outline and outline offset identify the currently focused control during keyboard navigation.
Required	Required example uses the native required attribute and a visible (Required) label.	The text label identifies the requirement, and native browser validation prevents submission when the required value is missing.
Valid	Valid email example contains a correctly formatted email and uses the .field-valid state.	The text begins with Valid: and the field has a distinct success border. Meaning is not communicated by color alone.

Invalid	Invalid email uses aria-invalid="true", aria-describedby, and .field-error.	The field includes explicit Error: text explaining the expected email format in addition to the visual error treatment.
Disabled	The disabled button uses the native disabled attribute.	The control is unavailable for interaction and appears visually subdued.
Static Server Returned Error	The specimen preserves the entered invalid email, provides an error summary linked to the field, uses aria-invalid, and associates the detailed error message with the control.	The summary identifies the affected field, the entered value remains visible, and the error text tells the user to correct the email and submit again.
